Position Title: Clinical Core Director

The AJ Drexel Autism Institute welcomes applications for the Director of the Clinical Core. The Institute is devoted to public health autism research and oversees a range of clinical research projects and community initiatives. The Clinical Core’s multidisciplinary team provides clinical support, oversight, and consultation, and engages in research and clinical practices to empower community providers and support the dissemination of evidence-based practices.

Successful applicants will hold a doctoral degree in clinical psychology, school psychology, social work, behavior analysis, or a related field. Applicants should have extensive clinical experience with developmental disabilities and autism spectrum disorder, and expert knowledge of behavioral-based assessment and intervention strategies. Applicants should also demonstrate research experience, supervisory experience, and a thorough understanding of community-based systems of support. Familiarity with federal and state regulations pertaining to early intervention and special education services is preferred. The ideal applicant will be organized, an effective communicator, and possess strong leadership and consultation skills. Applicants will be asked to develop contracts and cultivate partnerships with community agencies, educational entities, and faculty from across the University. In addition, the Clinical Core Director oversees the operations of the AJ Drexel Autism Institute clinic, manages the clinic space, and supervises clinical staff. Please apply at: https://careers.drexel.edu/en-us/job/494271/clinical-core-director.
