A working definition of strategic planning is a framework for comprehensive long-range planning that attempts to articulate the organization's strategic priorities to manage results. Strategic planning is the process of determining what an organization wants to be in the future and how it will get there. The organization examines the environment in which it competes, questions fundamental assumptions

Recently, various digital tools have emerged (or have become more accessible) that facilitate digital storytelling, implications of which are potentially wide-ranging for technologists, educators, and students alike. This course will critically examine the nascent world of digital storytelling in three parts. First, we will consider the fundamentals of (analog) storytelling, considering what elements make a good story and the qualitative research methods used to capture them. Second, we will consider
